- Other

*CBD and THC values are approximate. Terpene profile ratios are representative. The product you receive is subject to slight variability.

SOFTGELS FAQ

1 What do the different Softgels colours represent?

Blue Softgels contain oil produced from our premium indica varieties, reported to improve pain, nausea and sleep, and aid in appetite stimulation. Good for nighttime use.

Yellow Softgels contain oil produced from our premium sativa varieties, reported to improve mood, increase energy and aid in appetite stimulation. Good for daytime use.

Purple Softgels contain oil from CBD/THC-balanced varieties, reported to provide the therapeutic benefits of both THC and CBD.

Clear Softgels contain oil produced from our CBD-rich varieties, reported to have strong anti-inflammatory, anti-anxiety and seizure reduction properties. CBD is a non-psychoactive compound.

2 What are the benefits of softgel capsules?

Softgels are easier to swallow and have a longer shelf-life than standard oil capsules. They also provide a more cost-effective way to deliver the therapeutic benefits of premium cannabis oil.

3 What makes MedReleaf cannabis oils “premium”?

Through extensive scientific testing, MedReleaf has developed a proprietary solventless extraction process that produces a true medical-grade extract with the full complement of original plant cannabinoids and 95% terpene retention. Our oils are formulated using non-GMO high-oleic sunflower oil, which was specifically chosen for its batch-to-batch consistency and long shelf life.

As the only licensed producer (LP) to have earned internationally recognized ISO and GMP certification for manufacturing processes, MedReleaf sets the Medical Grade Standard™ for cannabis. No other softgel capsule can deliver the level of purity, quality, safety and efficacy that our Softgels provide.

4 Are MedReleaf Softgels approved by Health Canada?

Yes, MedReleaf received Health Canada approval for the sale of Softgels, becoming the first LP to bring colour-coded, variety-specific cannabis capsules to market.

5 How should I store MedReleaf Softgels?

Our softgel capsules are made from bovine gelatin; if pierced or exposed to heat, the oil inside will leak. Remember to store your medication in a cool, dry place, away from sunlight.

Softgels packaging is secure and tamper-proof. Please keep this and all medication away from children.
